⁺ Figures do not include NGLs and oil from nonconventional sources.

* Includes approximately one-half of Neutral Zone production.

** Includes the UK offshore, Norway, Denmark, The Netherlands offshore, and Germany offshore.

*** Does not include North Sea.

¹Includes crude oil, lease condensates, natural gas plant liquids, other hydrocarbons for refinery feedstocks, refinery gains, alcohol, and liquids produced from nonconventional sources.

Improve Your Fracturing Treatment Results with these Innovative Technologies.

Fracture Diagnostics Service

A non-radioactive alternative to conventional tracers, providing an easier and safer way for operators to optimize fracture treatments and improve results.

PropTracSM Benefits:

- Proppants with a built-in tagging material in the resin coating provide more accurate results
- Logs can be run as often as desired during the life of the well

Extreme Resin Technology Proppants

Designed specifically for extreme HPHT fracturing environments.

XRT CeramaxTM Benefits:

- Highest fracture flow capacity in the industry
- Proppant flowback control even under extreme conditions utilizing Stress BondTM (SB) technology

Waterfrac Proppant Technology

Field proven, partially cured resin coated proppants designed specifically for waterfracs.

Prime PlusTM Benefits:

- Superior "real-world" fracture flow capacity compared to uncoated sands, tempered sands, and uncoated ceramics
- Eliminates proppant flowback – the only partially cured waterfrac proppant available
