¹Includes crude oil, lease condensates, natural gas plant liquids, other hydrocarbons for refinery feedstocks, refinery gains, alcohol, and liquids produced from nonconventional sources.

Build better shale plays.

You need to understand your shale plays. Weatherford's extensive mud logging and core evaluation services, coupled with geosciences and reservoir engineering expertise, can help you better evaluate your prospects and prioritize development activities.

You need to drill and complete your shale plays. Weatherford's horizontal-well placement technology, coupled with completion, fracture stimulation and microseismic services, can help you better optimize well production.

You need to manage production from your shale plays. Weatherford's production and intervention products and services can help you better maximize life-of-well recovery.

To find out how we can help you build more value into your shale prospects, contact your Weatherford representative or visit weatherford.com.
